VOL. XV.

COLORADO SPRINGS, COLO. SATURDAY, JULY 28, 1888.

NUMBER 30

STATE POLITICS.

Date of the Republican State Convention Unanimously Decided.

A Meeting of the Democratic State Central Committee Yesterday.

A State League of Democratic Clubs Organized at Denver.

The Campaign Opened with a Talk Speech by Hon. J. S. Thomas.

Date Changed.

DENVER, July 26.—No meeting of the executive committee of the republican state central committee was held to day, it having been decided by a unanimous vote that the date of holding the state convention at Pueblo should be changed from September 11th to September 18th.

Democratic State Central Committee.

DENVER, July 26.—The democratic state central committee met at the Arapahoe club rooms at noon to day with nearly all the members present. The committee immediately after being called to order went into executive session and its deliberations were not made public. The basis of its organization was made, one delegate for each fifty votes cast for A. V. Adams for governor, and one delegate for each fraction over 25, except in the counties of Logan and Washington, who were authorized to appoint delegates in proportion to the largest democratic vote cast in those counties.

When the consideration of the place for holding the state convention came up, there was a money moved that Sevier be chosen as the place, the only other city contesting for this honor being Denver. The vote on the question resulted, 25 years to 25 nays. Arapahoe county refraining from voting having agreed to cast its vote with the majority. The vote being in the Arapahoe county cast her three votes for Denver while the other question in favor of the latter place. The time of holding the convention was left to the discretion of the chairman, who will issue the call in a few days. The meeting then adjourned. It is understood that the chairman will call the convention to meet some time about the first of September.

Campaign Opened.

DENVER, July 26.—Hon. Charles S. Thomas opened the democratic campaign in Music Hall this evening with a speech on the tariff. The house was crowded with a large number of gentlemen, and the speaker was enthusiastically received.

Democratic Club Convention.

DENVER, July 26.—The state convention of democratic clubs was called to order in Music Hall at ten o'clock this morning. About one hundred delegates, representing nearly every county in the state, were present. Hon. Charles S. Thomas was chosen temporary chairman, and in a brief speech thanked the convention for the compliment paid him. He stated the object of the meeting, and said a considerable enthusiasm manifested a democratic victory in November. G. L. Nagle, D. J. Lamont, and Al Andrews of Washington were chosen temporary secretaries.

On motion of J. D. McElroy of Arapahoe county a committee, consisting of one member from each club or county represented in the convention, was appointed on credentials. A similar committee was also appointed on permanent organization. A committee of six consisting of W. Browning of Arapahoe, G. M. Cook of Weld, S. A. Arbuckle of Bent, C. A. Coryell of Rio Grande, A. Van Aken of Gilpin and J. C. Anderson were appointed as a committee on permanent organization. The convention then took a recess until three o'clock.

On reassembling the committee on credentials reported no contests among the delegates, and the report was adopted. The committee on permanent organization made a report recommending T. J. O'Donnell of Arapahoe county, for permanent chairman. The report was adopted, and O'Donnell was unanimously selected. Judge Rogers read a telegram which desired the convention to forward to President Cleveland, congratulating him upon his successful administration and extending him the support of the democracy of Colorado and asking him to accept the "expressions of our highest esteem and our firm and fervent allegiance to the course which the democratic party has committed to your keeping." A motion to forward the same to the president was agreed to. The committee appointed to present plans for organization recommended that committees be appointed to immediately organize a branch league in every coun-

ty in the state and active measures for conducting the campaign. The report was adopted. The election of permanent officers being in order, Chas. F. Wilson of Arapahoe county was chosen president of the state organization. Presidents of the different leagues throughout the state were appointed vice presidents and the convention adjourned.

Kansas Republicans.

TOPEKA, July 26.—The republican state convention assembled here this morning, listened to reports of committees, took two votes on governor and attorney general, and adjourned until afternoon. In the afternoon C. L. Umphrey, an ex-lieutenant governor of the state, was nominated for governor. The ticket was completed as follows: Lieutenant Governor, A. J. Yeatman; secretary of state, W. Higgins; auditor, Q. C. McCarty; treasurer, George L. Van Atty, attorney general, Charles V. Logg. The platform endorses the national platform and nominees; commences the state administration, declares for the aims as against the坐上 and demands the complete execution of the "tutor law" in all parts of the state; denounces the prohibition party; favors protection in every sense of the word; endorses the pension policy recommended by the Winkler amendment and heartily endorses the course of Senator Watson's stand.

Preparing for Blaine.

WASHINGTON, July 26.—David T. Day, the chief of the division of mining statistics, has submitted a summary of the mineral products of the United States in 1887, in advance of the official report. The total value of the products is \$58,056,375. This is a wonderful gain over \$8,000,000 greater than the out-of \$85. The United States leads the world in the production of lumber. The principal gains were in the production of metals and the necessary for fitting them. The production of pig iron alone increased more than \$20,000,000. The high price of copper caused a notable expansion in that industry. The product of copper is the largest ever recorded. Taken as a whole the report shows great prosperity in the mining industry. The grand total value of more than a billion dollars.

COLORADO CITY.

The Pioneer Town of the Rocky Mountain Region.

A Glimpse at Its Past--Its Fall and Reinstatement.

The Reasons Existing Between It and Colorado Springs.

The Two Drawing Together--A Grand Future for Both.

Colorado City was at one time the metropolis of the Pike's Peak country, the Rocky mountain chain. This was before the civil war. The first settlements in this region, which was then accredited to the dominions of Kansas, were made almost simultaneously at Colorado City and Denver. The Pike's Peak fever was then at its height, and Colorado City on account of its location at the mouth of the Arkansas, became the gateway to the mining region. It grew and prospered, and when the cominon was extended within territorial boundaries, the first legislative assembly met its first meeting there.

Later reverses came, and the town faded into obscurity and for years lay buried, metaphorically beneath the encroaching leaves of its former prosperity.

Denver, meanwhile, on account of its easy access to the rich gold mines at Black Hawk, and its nearness to the first great transcontinental rail way, continued to prosper and has become the principal city of the Rocky mountain region.

Then Colorado Springs sprang up a short distance east of Colorado City, and came to sap its neighbor's root. As the new rival waxed in strength and numbers, Colorado City crumbled and faded. Many buildings were lifted from their foundations and moved bodily from the latter to the former place. Businessmen transferred their allegiance and deserted the sinking city, and Colorado City, with the few remaining stone mansions, crept further into its shell, awaiting the dawn of a better day.

That day has come, and with the wave of prosperity that has swept over the entire state during the past two years, Colorado City has received perhaps the largest proportionate share. No other town, with the exception of a few mining camps, has multiplied its population to such an extent within the last year, or so often on account of its real estate values as Colorado City. "Our Town" is but a legend. Now a brisk and bold possessing little city not only surpasses, but exceeds, in grandeur the state's capital, and, not even the old city can say, "We once were greater."

The first intent to this change--the one which also has a similar effect upon Colorado Springs--was the building of the Colorado Midland rail way through the pass, and thus Colorado City owes its reinstatement to importance to the cause which first brought it into existence.

The rivalry which to some extent existed between the two towns yester year, now together so much nearer now than ever before, is fast disappearing--in fact exists now only in tradition. Their interests are now identical. What benefits the one aids the other, and during the present struggle for industrial advantage the business men of both cities are working together in unison. The building boom in both cities is drawn together by a core of sympathy, have passed eastward, in the one and westward in the other, and now only a small remnant remains to be left to iterate the dividing line and unite the two in one.

Contests will be fierce. The union means strength, and a glorious future for the two in one is just as sure as Colorado's sons are inimitable, and as severance and industry and a spirit of patriotism are bound to win.

Wool Market.

Coates Bros. of Philadelphia, in their last wool circular, state that there have been but slight changes in eastern markets. As supplies come forward, values become more settled, and more firmly established. The demand for most grades is fair, but manufacturers buy only for actual wants and are very conservative. The worsted spinners are especially cautious, and are not willing to pay more for comings than for goings. But little worsted machinery is now running, and that at no profit. In some parts of the west buyers are paying higher prices than are warranted by present eastern values, showing thereby that they have sufficient confidence in the future to secure light and desirable wool at what, under other circumstances, would seem to be a low intrinsic value. In other sections buyers have largely withdrawn, and wool can be bought at low figures. Many growers however decline to sell at present, and some will undoubtedly hold over the season. The fall of the wool is approaching the stage where it is now expected it will pass the house, and go to the senate, and it seems most probable that will then be met with such protective amendments, that a conference committee of the two houses cannot agree. But whether this will be quickly determined, and congress will adjourn leaving the question unsettled, or whether the present situation will be long continued, with a free wool of dependence,

on the narrow majority of the senate, is the uncertainty which depresses trade in wool and woolens.

The following quotations on Colorado wool's are given:

Medium and fine, white..... 20020

Medium and fine, yellow..... 20020

Common and coarse, yellow..... 19018

Coarse, carpet..... 14016

DEEP WATER FARES.

Expressing Interview with Mr. Ben Bent of the City,

As Attended the Deep Water Ferry at Fort Meade,

The Five Points Defeat the Colorado Springs in the Third Inning.

The game was a Saturday afternoon between the Colorado Springs and Five Points clubs was witnessed by one of the largest audiences of the season.

The game was an interesting one throughout, though it was lost by the home club in the third inning through glaring errors. After theinning Ferguson son settled down and the visitors only secured one hit of him during the remainder of the game.

Bates pitched his best game of the season, and at the four batters down four scattering hits. He was well supported by Everett, A. McLaughlin at short notice a number of division stops, art. 1. At second stop, stopped a number of hits, ground hits, Lynch, DeWitt and Fitzgerald made the most glaring errors of the game. The insurance was won by the home team, and the visitors were the losers.

At the end of the game, the home team was given a victory, and the visitors were given a loss.

THOMPSON'S CONFESSION.

A New Suspect in the Great Egerton Murder Mystery.

William Thompson Arrested for the Commission of the Crime.

He Confesses Himself to be the Murderer While Intoxicated.

His Preliminary Examination Begun Tuesday Morning.

At last a move has been made in the great Egerton murder mystery, while, while it may not throw any light on the Colorado Springs' "Yard 30th," will show to the public that the authorities, and particularly Sheriff Jackson, are leaving no stone unturned to ferret out the author of the horrible deed. William Thompson, a 40-year-old man, Thompson, as he is familiarly known, has been arrested for the murder of Mrs. M. J. Kearney and his preliminary examination was begun before Justice of the Peace Corman Tuesday morning.

Thompson was on the most intimate terms with Mrs. Kearney. His cabin was only a few hundred yards from her house; he cut her kindling wood, did her chores and for a long time carried her mail to and from the Egerton post office. When she visited her friends in Denver, Thompson was to one of her departure, and watched her from his window during her absence. Even after death he followed her, and exercised a day vigil about the scene of the crime.

When the terrible discovery of the bodies of the murdered victims was made, Thompson professed the most profound and sincere sorrow. To a GAZETTE reporter, a few days after the bodies were found, he exclaimed with tears in his eyes, "Mrs. Kearney was like a mother to me." Many times, he said, on her way to the restaurant or mill, after work, she would leave me some fresh biscuits, pies or some sort of luxury." She gave him the comfortable mattress on which he slept and showed him many little acts of kindness.

The first impression which one would form from looking at the man would be that he was a simple-minded person, and utterly incapable of committing such a dastardly crime as murder. This impression would be further strengthened by conversing with him. He then appeared, as being perfectly out-spoken and unreserved. When the GAZETTE reporter visited the same ranch in company with Sheriff Jackson on Tuesday to follow up the Saturday on which the bodies were found, Thompson was the first person whom they met in the vicinity of the ranch. Notwithstanding the sheriff's oft-repeated injunction to refrain from speaking to anybody outside of the authorities concerning the affair, he talked with the utmost freedom about it, and more than once exclaimed, "What a horrible thing," and eagerly asked if the sheriff had any clue of the perpetrator.

Thompson, previous to the departure of the sheriff from the ranch, said to the reporter, "Of course people will suspect me of the crime, but I have no idea who did it." From all that can be learned about him, he is no native in this state; he has eked out a solitary existence for the past eight or ten years, and has been living near the ranch since '88.

A most irresistibly suspicion has been directed towards Thompson, for the reason of his intimate relations with Mrs. Kearney, and the fact that he did not discover the whereabouts of the bodies, though according to his own statement, he visited the ranch every day after the supposed date of the murder.

The last words which Sheriff Jackson addressed to Thompson before leaving him on the day on which he visited the ranch, were to the effect that he should see his mouth closed, and speak to nobody about the murder. Had he followed this advice he would not now be behind the prison bars, or run the risk of standing upon the gallows.

The old man's fatal weakness is the love of whisky. One swig of liquor will produce in him a thirst for more, which is never quenched until he reaches a state of mind in intoxication. The story of his life, and his impoverished and lonely existence can almost be told by observing the nervous manner, and eager expression which accompanies every glass of liquor which he drinks.

When under the influence of whisky he is the most communicative of persons, and will talk with anybody. About six weeks ago Thompson came to Colorado City, and in a short time had fallen a victim to his fatal indulgence. He was arrested for drunkenness, and being unable to pay his fine, he was put to work on the streets. When his sentence expired he became intoxicated again, and on that occasion let "a" word or two which conveyed the impression that he knew more about the murder than he had yet told. He returned to his ranch soon after his second escapade, but in a little while came back to Colorado City, or another debauch. While in a semi-state of intoxication he declared, in one of the Colorado City saloons, in the presence of four witnesses, "I killed Mrs. Kearney, but I did not kill the boy." Since he made this declaration he has been kept in the Colorado Springs' "Yard 30th,"

BLACKSMEN AT WORK.

The Colorado Springs Post Office Successfully Organized.

Money and Stamps to the Amount of \$2,000 Stolen.

Besides a Large Number of Registered Letters and Packages.

No One of the Guilty Parties Yet Discovered.

On Monday night as the members of the night police force passed their beats on Colton street they little dreamed that the Colorado Springs post office was being successfully burglarized. The first persons who arrived at the post office yesterday morning were Lester Carriger's Knapp and Daniels, who entered the building about six o'clock. Their unusual taking watch attracted their attention was the large safe in which the stamps are kept lying open on the door. As this box is always kept in the large safe, they were surprised to find it there. But their astonishment was still further increased when they examined the safe. A small hole had been drilled through the safe door near the combination dial, and when they tried to open it ready opened.

When Assistant Postmaster W. O. Shipley arrived a more thorough examination of the premises was made.

Over one hundred people went to Pueblo on Sunday afternoon on the special excursion train to witness the game between the Five Points and the Colorado Springs clubs. About 1,000 people saw the game, which was an exciting one, turning out.

The means by which the burgars, undoubtedly there were more than one, gained access to the building was through the north rear window. The fastener on the upper part of the window had been broken, and it couldn't be raised without any difficulty. But the heavy wood and shutters which enclose both windows had been shut and securely fastened. The shutter was held open with a piece of wood or iron, and after this had been accomplished access to the room was made with little trouble.

The manner in which the hole was drilled and its location with reference to the box proves that it was the work of experienced craftsmen at safe crackers.

The safe had been left intact, and the burgars would have been forced

to break through the door to get at the

valuables.

It is estimated that fully a half hour must have been consumed in drilling it.

As soon as the burgars became generally known Tuesday morning the most extravagant rumors were circulated concerning the amount of the stolen property. Some placed the loss at fully \$5,000, while others conjectured it would not fall below \$2000.

Post Inspector A. J. Branen, of Denver, who was in charge of the burgary early yesterday morning arrived from Denver at 11 a.m. to take charge and at once proceeded to investigate the circumstances of the affair. He and Mr. Saito were very busily engaged until an early hour this morning in checking up the accounts of the office in order to ascertain the exact loss. They estimated that it would be in the neighborhood of \$2000, not including the registered letters.

Of that amount about \$800 was in cash and the remainder in stamps of various denominations. The burgars examined a part of the registered letters before taking their departure from the building and left them in the counter in the rear of the building.

The authorities are without any clues which would lead to the identification of the burgars. They did their work well and quickly, and left the building as secretly as they entered it. Dr. W. L. Bartlett, who is keeper of the post office, states that he was awakened during the night by the noise of footfalls in the room below, but as the sound soon ceased he paid no further attention to it. When the GAZETTE forced its way into the building about a quarter to four o'clock a nicely dressed young man was waiting up and down the staircase near the northeast corner of Euerano and Colton streets. He appeared to be waiting for some of the police who were near at hand. There was nothing suspicious about his actions and no particular attention was paid to him.

Resolved. That we sincerely condole with the family and friends of the deceased on the loss we have sustained, by the death of our brother, John A. Smith, and of the still heavier loss sustained by those who were nearest and dearest to him, therefore, be it

Resolved. That it is but a just tribute to any memory of the departed, to say that in regaining his repose from our midst, we mourn for one who was in every way worthy of our respect and regard.

Resolved. That we sincerely condole with the family and friends of the deceased on the loss we have sustained, by the death of our brother, John A. Smith, and of the still heavier loss sustained by those who were nearest and dearest to him, therefore, be it

DISSEMBLY SCENES.

Eastonville Village the Scene of a
Cracker Riot.

A Disrespectable Place the Scene of
the Disturbance.

Revolvers Freely Discharged and the
Public Safety Jeopardized.

First Fumble Prevented by the
Arrest of a Saloon Keeper.

Ever since grading began on the Rock Island road near Eastonville the law-abiding citizens of that place have been greatly annoyed by the acts and presence of a man who is known to be a saloon in the village, who soon became the resort of all the bad characters in the neighborhood. The old saloon, which was the scene and cause of a number of tragedies, was closed last winter, and the village enjoyed a short period of peace and quiet.

A man arrived in Eastonville last April who opened a saloon in a tent, and the only ones who could disturb the peace were at once removed. At last the citizens determined to close the saloon, and notified the proprietor accordingly. He persisted in keeping the place open, but one night it took fire and burned to the ground. The owner of the saloon was quite incensed over his loss, and communicated with the sheriff with a view to having the affair investigated. But as he openly violated the law in selling liquor in less quantity than a quart, he soon learned that the best course for him to pursue was to leave no further scenes in the matter.

When the grading camps on the Rock Island were established near Eastonville, two saloons were opened in the village, one of which soon became the scene of drunken fights and brawls. On Sunday the village was filled with inebriated men, who steadily took possession of the camp. Eastonville was the crisis was reached, and the law-abiding citizens arose to the emergency of the occasion. Last week the proprietor of the saloon came to Colorado City and took two respectable women back with him.

On Saturday night the village assumed a carnival hue. Men came in from the grading camps, who soon obtained a plentiful supply of the saloon's article so dear in the saloon.东区 was soon put into service late in the evening, and the bustle continued through out the night. Fortunately no person was injured, though an empty freight car was riddled with bullets. On Sunday the disorderly scenes of the previous night were repeated. Drunken men walked through the village firing their pistols in every direction, and the citizens became warned for their own safety and that of their families.

The residents of the place determined to prevent any further annoyance from that source, and on Monday morning the man and the two women were arrested by Deputy Sheriff A. C. Lubanks.

Their ordinary examination was at the office of Justice of the Peace A. J. Whitmore on Tuesday, and a warrant was issued over to the district court. There are four charges against the saloon keeper, one of which is selling liquor in violation of the state law.

FIRE DEPARTMENT ELECTION.

Mr. C. B. Ferrin Elected Chief by a Large Majority.

Notwithstanding the disagreeable weather, considerable interest was manifested in the election of a successor to Chief Draughon of the fire department, which was held Wednesday evening. As this was the first election held under the new ordinance, there was some curiosity as to how the "pop-up" vote system would succeed. As far as could be learned, it gave complete satisfaction, and the election passed off quietly and without disturbance. There were two candidates for the office, ex-Chief Ferrin, and the present first assistant chief, Mr. Pearce. The friends of both candidates turned out in force, and worked earnestly for the success of their favorite.

The ballot box was in charge of the following board of judges:

M. B. Irving, of the 1000, Augustus House, of the Matt. Phane, C. S. Somers, of the Crown's, Clarence Arnold, of the College, and J. A. Yango, of the Browns.

A voting began at half past seven o'clock, and from it at ten o'clock the polls were declared closed.

Out of a total registration of 67, votes were cast. The vote was distributed among the various companies as follows:

Hoots 33, College 19, Crowes 20, France 20, actions 22.

The election resulted in the success of Mr. Ferrin by the following vote:

Ferrin 41

Pearce's majority 32

The old bass road near Summit Park was badly washed by the heavy rain of Monday afternoon. The road, overseen of that district on Tuesday but a force of men at work to repair the road and ordered a derrick and other necessary material from this city.

Barry & Fay will appear at the opera house next week in "McKenna's Fiftieth" and "Muddon's Picnic."

County Commissioner J. C. Woodbury has been selected as the vice president for El Paso county of the Colorado Austria association.

County Clerk Eaton has prepared a circular giving the boundaries of all the election precincts in the county, which will be forward to all the judges and clerks of election.

The contract for constructing the pipeline from West Monument creek to Austin's Mill has been awarded to Russel & Alexander, of this city. They will probably have the work completed by November 1st.

Mr. Robert A. Meier, the newly appointed postmaster, and Mr. O. M. Howart, of the Saturday Mail, were the representatives from the Colorado and Durango Miners' Club, this city who attended the state convention of democratic clubs at Denver yesterday.

Dr. Mary E. Ryan, of "Vivide" via, as located in this city at No. 115 St. Vrain street, will engage in the practice of her profession. She is a graduate of the Woman's Medical college of Philadelphia and was a resident surgeon at the Woman's hospital of that city for a year.

Mr. G. A. Cartwright, the traffic manager of the Colorado Midland rail road, has submitted his resignation to take effect on August 1st. Mr. Cartwright has been a joint general agent of the Atchison, Topeka & Santa Fe way system in California and will leave for that state immediately after the first of the month. Mr. Cartwright's relations with the Midland have been of the most pleasant character, and he has made many friends for the road by his fair and courteous manner. The Midland will do well if it succeeds in securing as eminent a person to take his place.

His successor has not yet been appointed. A short while ago a woman arrived in this city and inserted the following advertisement in the Gazette:

Wanted: A woman for light clean work. Wages \$8 to \$12 per week. No canvassing. Work can be taken home if desired. Call after 8 a.m. at No. 16 South Vrain street, Room G.

On the day after this advertisement the woman was besieged with applicants, and disclosed the method by which they were to "earn" their a gratifying salary. For the sum of \$5.00 she volunteered to tea and the applicants now have to pay dress or terms, and assured them that, having mastered the art, they could easily earn the salary stated. Quite a number of them she received sums ranging from \$1.50 to \$2.50. Wednesday morning when her master repaid her round they found her missing, and later ascertained that she had left the city. Some of the intelligent women at once went in search of a lawyer, and a effort was made to prosecute the guilty party.

Weekly Market Report.

Corrected weekly by A. Remington & Son, dealers in western and retail groceries and general produce, No. 17 South Vrain street.

RAISIN PRODUCE.
